PHILOSOPHY | HUMAN–AI INTERACTION | EVALUATION RESEARCH

RESEARCH PROFILE

M.A. candidate in Philosophy investigating human agency, conversational control, and AI-mediated discourse. Developing an interdisciplinary evaluation methodology that translates philosophical questions into observable linguistic features. Combines research and computer science coursework with university teaching, assessment design, and extensive experience leading complex operational projects.

EDUCATION

San Francisco State University | M.A., Philosophy (complete, expected 12/2026)
San Francisco State University | Ethical AI Certificate (in progress, expected 5/2027)
San Francisco State University | B.A., Philosophy, 2024; 3.96 GPA
City College of San Francisco | A.A., Philosophy; A.A., Economics, 2022; honors

SELECTED RESEARCH AND TECHNICAL PROJECTS

AI Behavioral Relativity: Classifying Conversational Dominance in Human–LLM Interaction
Research Project & Experimental Design | Team Lead | SFSU, 2026
• Lead a four-person interdisciplinary research team designing an LLM-based evaluation framework for conversational dominance and human agency in sustained human–AI interaction.
• Developed a comparative experimental protocol incorporating human-annotated reference labels, baseline and rubric-guided prompting, cross-model evaluation, and classification metrics including precision, recall, and F1.
• Designing linguistic annotation criteria and conversational visualizations to investigate changes in conversational control, with empirical testing and validation forthcoming.
Machine learning classification coursework | Applied computer science
• Applied Python, scikit-learn and Random Forest classification to a gene-expression dataset; investigated prediction, feature selection and model evaluation in a supervised-learning assignment.
AI ethics and philosophical research | Graduate scholarship
• Research interests include normative and AI ethics, epistemic rupture, AI-mediated self-governance, technological power, and philosophical methods for evaluating complex reasoning.
Resisting Stasis: Embodied Pedagogy for a Technocratic Age | Graduate scholarship
• Research paper completed in 2026 operationalizing phenomenological claims from Heidegger and Bachelard on epistemic obstacles, rupture, and poesis into pedagogical methodology and course design.

TEACHING AND ACADEMIC LEADERSHIP

Graduate Teaching Associate, Department of Philosophy | SFSU | 2023-Present
• Designed and taught four independent Critical Thinking (PHIL 110) sections; 100+ hours of university-level instruction.
• Developed assignments and assessment rubrics for argument structure, logical reasoning, rhetoric, and informal fallacies.
AETHOS | Founder, Interdisciplinary AI Initiative | SFSU | 2026 - Present
• Founded and currently leading an interdisciplinary initiative at SFSU connecting students, faculty, and industry professionals around human-centered AI research, education, and public engagement.
• Developing organizational governance, research partnerships, and an independent nonprofit structure to support student-led research and public programming.
Philosophy Club President; student representative | SFSU | 2023-2024
• Organized public discussions, events, and interdisciplinary programming. Previously served on the departmental student representation and majors committee.

RESEARCH METHODS AND TECHNICAL COMPETENCIES

Research methods: Philosophical and conceptual analysis; argument evaluation; symbolic logic; qualitative discourse analysis; research design; rubric development.
Computational methods: Python; scikit-learn; supervised classification; Random Forest; feature selection; introductory model evaluation.
AI and productivity tools: Claude, ChatGPT, Google Gemini, Adobe Creative Cloud, Microsoft Excel, Google Workspace, Canvas LMS.

SELECTED PROFESSIONAL EXPERIENCE

Desmoto Sport | Motorcycle Systems Consultant & Associate Mechanic | 2020–present
• Perform complex mechanical diagnostics and technical troubleshooting across interconnected electrical, mechanical, and electronic systems.
• Develop technical documentation and manage digital operations, including website administration, e-commerce workflows, and customer communications.
Magnolia Brewing Company | Executive Chef & Assistant General Manager | 2016–2018
• Led a 25+ person team through operational changes; reduced cost of goods by approximately 20% and contributed to 28% revenue growth.
Proof Grainworks / Foghorn | Founder & Director of Operations | 2012–2016
• Secured $175,000 in private funding and $15,000 in municipal grant funding; managed 30+ public events and cross-sector partnerships.
Starbucks Coffee Company | Assistant Store Manager | 2002–2007
• Full management training pipeline including P&L and financial systems, training trainers, and compliance.

HONORS AND SELECTED ACADEMIC SERVICE

Anita Silvers Scholarship in Philosophy (2024); Benny and May Chin Achievement Scholarship (2023); Regional Ethics Bowl (2023). UC Berkeley Community College Research Conference Presenter (2010)
